Technical Skills

Languages and developer tools: C++, Kotlin, Java, Flutter, Angular.js, Android Studio, VS Code
Technologies/Frameworks: Kotlin coroutines, DaggerHilt DI, Rest APIs, Git/Confluence/Jira, Google Admob, MVVM/MVP arch patterns, Retrofit/OkHttp, Room, Navigation-component, Jetpack compose, databinding

Experience

Misfits Tech Corp. (Startup)   Android/Flutter Developer Lead   October 2023 - Present
- Integrated Google Admob framework into a flutter project focused on Android.
- Created custom animations and UI components for better user experience.
- Lead developer ensuring code quality and managing all phases of app development i.e. building, testing and releasing the application.
- Restructured application's architecture, increasing performance by 40% and stabilizing the application with a reduction in bugs raised by QA by 30% under my leadership as Dev Lead.
- Worked closely with design team and offered creative solutions that were used for creating a better UI flow.

Royal Bank of Canada   Android Developer   August 2016- March 2019
- Improved Rewards app performance by 30% and reduced crash rates by 70%.
- Managed, lead and delivered features of Avion Rewards app with the lowest defect rates.
- Collaborated with RBC Banking and Wallet team to implement SSO (Single Sign-On) for the Rewards app.
- Migrated around 15% of the app code from Java to Kotlin.
- Integrated the app with Facebook, Dynatrace and Google analytics to register user impressions.
- Worked and led on major features of the app namely Fingerprint sign in, SSO (Single Sign-On) and Travel that allowed users to book flights on Expedia using rewards points.
- Experienced with all phases of Android development – Requirement gathering, analysis, UI design, development and deploy to the app store.
- Migrated and implemented Rest API calls using Retrofit.

Projects

Name: [Guess that Sound](#)	Flutter puzzle game to guess/identify diff sounds	Developed in Flutter/ Dart
Name: [Marvel AW planner](#)	Android app for game players to manage champions	Developed in Kotlin, custom UI, MVVM arc.
Name: [Foody](#)	Android app to search for food recipes	MVVM, data binding, navigation component, Rest API network calls.
Name: [Programmer's Mind](#)	Personal coding blog to write my own articles and understanding of various topics	Languages: C++/Kotlin/Android
